In the chapter **LANDSCAPE**, Greenland's spectacular scenery is presented, where ice in every imaginable form moulds and creates a natural beauty unparalleled in the world.

Ice shapes the landscape  
 The mighty Inland Ice  
 Turquoise lakes and streams  
 Glaciers are retreating  
 Nature's unique art  
 The dance of the Northern Lights  
 A country without forests  
 Tales of geology  
 Kuaaanit

Take a tour of Greenland's **TOWNS & SETTLEMENTS**, starting in East Greenland, rounding the country's southernmost point, then heading north along the coast of West Greenland to end up in the world's northernmost settlement in the Thule area.

Ittoqqortoormiit | Tasiilaq  
 Tiilerilaaq | Kuummiut  
 Qaqortoq | Arsuq | Nuuk  
 Maniitsoq | Sisimiut  
 Kangerlussuaq | Aasiaat  
 Ilulissat | Qeqertarsuaq  
 Saqqaaq | Uummannaq  
 Upernavik | Qaanaaq  
 Qeqertat | Siorapaluk

Carsten Egevang's background as a biologist is evident in the chapter on **WILDLIFE**, where Greenland's animal species are described, with a special focus on their adaptations to the Arctic climate.

**A huge seal with tusks**  
 The walrus is a member of the seal family and can weigh up to 2,000 kg (4,400 lb). It has two tusks that are made of keratin, a protein that is also found in human hair and nails. The tusks are used for defense, to break through ice, and to hold onto prey. The walrus is also known for its ability to hold its breath for up to 20 minutes underwater.

**The lone wanderer**  
 The Arctic fox is a small, hardy mammal that lives in the Arctic region. It is known for its ability to change its fur color from white in winter to brown in summer. The Arctic fox is also known for its ability to survive in extreme cold and its diet of lemmings and birds.

**Mythical gulls**  
 The Arctic region is home to several species of gulls, including the white gull, black gull, and red gull. These gulls are known for their ability to survive in extreme cold and their diet of fish and other marine life. The white gull is the most common species, while the black and red gulls are more rare.

- The lone wanderer | The mythical narwhal
- Canary of the sea | The tourist-friendly whale
- The World Champion | The slim giant
- A huge seal with tusks | The important ringed seal
- The singing seal | Seasonal visitors
- The hardy ungulate | A deer with snowshoes
- Master of survival | Lean but warm | Master diver
- Birds by the millions | Black, white and red
- The two eider ducks | The meowing gull
- A life in the sky | Mythical gulls
- Two species of falcons | The Flying Door
- The four common ones | The clever raven

In the **CULTURE** chapter, the reader gets an insight into Greenland's unique culture, where dog sledding and kayaking are still important elements of a living cultural heritage.

**Bird hunting**  
 Bird hunting is an important activity in Greenland. It is a traditional way of life that has been passed down from generation to generation. Bird hunting is used for food and for sport. The most common birds hunted are ptarmigan and eider ducks.

**Kayaking**  
 Kayaking is a traditional sport in Greenland. It is a way of life that has been passed down from generation to generation. Kayaking is used for transport and for recreation. The most common kayakers are the Inuit and the Greenlanders.

- The mummies of Qilakitsoq
- The unique national costume | The dog sled
- The Greenland Sled Dog | A life in the cold
- The traditional use of the kayak
- The kayak's comeback | Kayak tourism
